PROFESSIONAL SUMMARY

- Data-driven analyst with 1.6+ years in workforce management, building forecasting systems, dashboards, and process automation that turn raw operational data into decisions for leadership and clients.
- I bridge business problems and technical solutions — from building a forecasting system that reduced manual planning effort at TELUS Digital, to independently building an AI-powered job search platform end-to-end. Bringing strong requirements-gathering instincts, stakeholder communication, and a builder's approach to a Business Analyst role.

WORK EXPERIENCE

TELUS Digital – Resource Planning Analyst.

April 2025 - Present

- Recognized with the **Pinnacle Award** for delivering high-impact workforce planning insights and consistently exceeding performance expectations.
- Analyzed workforce and operational data using **Google Sheets, Excel, SQL (MySQL), Looker Studio, and CAP-Ability (Datanitiv)** to forecast staffing needs with high precision and consistency.
- Developed and maintained capacity and staffing plans with **98%+ accuracy**, collaborating with Operations Managers, Business Partners, WFM leadership, and clients to align workforce strategies with evolving business goals.
- Created and shared volume forecasts using multiple **forecasting methods**, providing clients with clear visibility into daily, weekly, monthly, and annual demand to support **operational and financial planning**.

The Data Monk - Data Analyst Intern.

January 2025 – May 2025

- Collaborated with the founder to strategize content that increased **book sales by 20%** while boosting website traffic by **40%**.
- Wrote 60+ SEO-friendly blogs on data analytics, securing first-page Google rankings and enhancing user engagement by 35%.

PROJECTS

Job Hunterz N18 | Product Design, HTML, CSS, JS, Supabase, Vercel, LLMs, Prompt Engineering | [Website](#) June 2026

- Built an end-to-end job discovery tool that scrapes LinkedIn, Naukri, Instahyre, and Internshala daily using Python, public APIs, and Google Apps Script, pulling 100–300 fresh listings straight into a Google Sheet on a scheduled basis.
- Extended the workflow with a Chrome extension that auto-fills job applications using saved user data and an LLM, taking the product from discovery to application with minimal manual effort — owned the full lifecycle from problem identification through design, build, and iteration based on personal usage

Product Research & Analysis | Google Trends API, Power Query, Power BI | [Live Dashboard](#)

November 2024

- Built an interactive market intelligence dashboard using Google Trends API and Power BI to analyze 17,000,000+ real-time search records and identify emerging demand patterns.
- Performed trend analysis and keyword performance evaluation to support data-driven business strategy and client advisory insights.

SKILLS SUMMARY

- **Technical Skills:** Business Analysis, Business Requirement Gathering (BRG), KPI Definition & Tracking, Root Cause Analysis (RCA), A/B Testing & Hypothesis Testing, JIRA, Google Workspace, Slack, Data Analysis & Visualization, Excel (Advanced), Power BI, Tableau, Google Data Studio, MySQL, Python, Google Sheets, Statistical Analysis, Descriptive statistics, Market & Competitor Research, Google Analytics
