PROFESSIONAL SUMMARY

- 1.6 years of experience in resource planning at TELUS Digital, working closely with clients and leadership to plan staffing and hiring. Skilled in translating complex data into actionable insights using SQL, Advanced Excel, Power BI.
- I don't just analyze problems — I build solutions, from a forecasting system that cut manual planning effort at TELUS Digital to a self-built AI job search platform used to scrape, filter, and manage hundreds of live listings. Looking to bring that same builder's instinct and data fluency to a product management role.

WORK EXPERIENCE

TELUS Digital – Resource Planning Analyst.

April 2025 - Present

- Received the Pinnacle Award for performance impact while regularly presenting forecasting and capacity insights directly to client and leadership stakeholders
- Built a volume forecasting system that reduced manual forecasting effort and improved planning accuracy by **7 - 10%**.
- Designed an executive dashboard consolidating **attrition, shrinkage, staffing, and headcount metrics** into a centralized reporting platform used by leadership and clients to track staffing and performance for planning decisions.
- Created and shared volume forecasts using multiple **forecasting methods**, providing clients with clear visibility into daily, weekly, monthly, and annual demand to support **operational and financial planning**.

PROJECTS

Job Hunterz N18 | Product Design, HTML, CSS, JS, Supabase, Vercel, LLMs, Prompt Engineering | [Website](#) June 2026

- Built a tool that checks LinkedIn, Naukri, Instahyre, and Internshala every day and pulls in new job listings automatically, usually 100 to 300 a day, straight into a Google Sheet.
- Built a Chrome extension on top of it that fills out job applications automatically using my saved details, so the whole thing goes from finding a job to applying for it with barely any manual work.
- Integrated Python, public APIs, Google Sheets API, and Apps Script to automate the complete job discovery workflow with scheduled daily updates.
- Managed the product from problem identification and feature design through implementation and iteration based on personal usage.

Product Research & Analysis | Google Trends API, Power Query, Power BI | [Live Dashboard](#)

November 2024

- Built an interactive market intelligence dashboard using Google Trends API and Power BI to analyze 17,000,000+ real-time search records and identify emerging demand patterns.
- Performed trend analysis and keyword performance evaluation to support data-driven business strategy and client advisory insights.

SKILLS SUMMARY

- **Technical Skills:** Business Analysis, Business Requirement Gathering (BRG), KPI Definition & Tracking, Root Cause Analysis (RCA), A/B Testing & Hypothesis Testing, JIRA, Google Workspace, Slack, Data Analysis & Visualization, Excel (Advanced), Power BI, Tableau, Google Data Studio, MySQL, Python, Google Sheets, Statistical Analysis, Descriptive statistics, Market & Competitor Research, Cohort analysis Google Analytics, Prompt engineering, AI, LLM, APIs, Funnel analysis, Product Requirements Document (PRDs)
